## **Here's Death**

Excerpt from Locating the Factory The United States Steel Corporation found it profitable to build a whole new city, but the American Rolling Mill Company finds it profitable to remain where it is; Henry Ford advocates that factories move to rural towns, while William Miller Booth states that The modern American city is the nucleus of successful manufacturing. These seem like conflicting opinions, but if we will examine the basic factors that should govern the locating of a factory, manufactory, or other enterprise, we will see that selection and decision can be made scientifically, accurately and safely. ## **Capital Ideas**

The right of governments to employ capital controls has always been the official orthodoxy of the International Monetary Fund, and the organization's formal rules providing this right have not changed significantly since the IMF was founded in 1945. But informally, among the staff inside the IMF, these controls became heresy in the 1980s and 1990s, prompting critics to accuse the IMF of indiscriminately encouraging the liberalization of controls and precipitating a wave of financial crises in emerging markets in the late 1990s. In *Capital Ideas*, Jeffrey Chwieroth explores the inner workings of the IMF to understand how its staff's thinking about capital controls changed so radically. In doing so, he also provides an important case study of how international organizations work and evolve. Drawing on original survey and archival research, extensive interviews, and scholarship from economics, politics, and sociology, Chwieroth traces the evolution of the IMF's approach to capital controls from the 1940s through spring 2009 and the first stages of the subprime credit crisis. He shows that IMF staff vigorously debated the legitimacy of capital controls and that these internal debates eventually changed the organization's behavior--despite the lack of major rule changes. He also shows that the IMF exercised a significant amount of autonomy despite the influence of member states. Normative and behavioral changes in international organizations, Chwieroth concludes, are driven not just by new rules but also by the evolving makeup, beliefs, debates, and strategic agency of their staffs.

## **Locating the Factory (Classic Reprint)**

WEST WITH THE NIGHT appeared on 13 bestseller lists on first publication in 1942. It tells the spellbinding story of Beryl Markham -- aviator, racehorse trainer, fascinating beauty -and her life in the Kenya of the 1920s and 30s. Markham was taken to Kenya at the age of four. As an adult she was befriended by Denys Finch-Hatton, the big-game hunter of OUT OF AFRICA fame, who took her flying in his airplane. Thrilled by the experience, Markham went on to become the first woman in Kenya to receive a commercial pilot's license. In 1936 she determined to fly solo across the Atlantic -- without stopping. When Charles Lindbergh did the same, he had the wind behind him. Markham, by contrast, had a strong headwind against her and a plane that only flew up to 163 mph. On 4 September, she took off ... Several days later, she crash-landed in Nova Scotia and became an instant celebrity.

They are our neighbors and our natural partners in trade and security. America's strength is closely connected to its economic well-being. When we break down trade barriers, American trade and American jobs increase. Trade is the lifeblood of [the] State of Texas. Last year in Texas, almost 1 million jobs were supported by some form of trade. Texas has been the top exporting State in the United States for 14 consecutive years. The overwhelming majority of Texas exporters are not big corporations, but 93 percent of the Texas exporters are small and medium-size businesses. In my district of Houston, over half of the economy depends on trade. Houston has one of the largest ports in the world and is the oil and gas capital of the world. Mexico is Texas' number-one exporting partner. Over 10,000 trucks a day pass the Texas-Mexico border, all involved in trade. Texas is just one of the many States that rely on NAFTA to fuel the economy. Study after study have shown that increased trade leads to increased jobs for all Americans. More jobs mean more wealth for Americans. NAFTA supports 14 million jobs in the United States, and, thanks to NAFTA, trade between the U.S., Mexico, and Canada has tripled. Nearly every industry is affected in one way or another by NAFTA. The U.S. economy relies on NAFTA.
